

Richard Vincent

SOC Analyst | Junior Cybersecurity Analyst

Atlanta Metropolitan Area | [linkedin.com/in/richvince](https://www.linkedin.com/in/richvince) | richvince.github.io

PROFESSIONAL SUMMARY

CompTIA Security+ certified cybersecurity professional with 9+ years of experience supporting enterprise infrastructure, networks, and client environments. Hands-on training and portfolio work in threat detection, incident triage, security monitoring, network defense, phishing analysis, log review, vulnerability awareness, and defensive security operations. Currently completing Splunk Core User training with certification testing planned within the next month.

CORE SKILLS

Security Operations • Threat Detection • Incident Triage • Network Security • Splunk (In Progress) • Packet Tracer • Wireshark • Qualys • Access Control • Firewall Policy Support • TCP/IP • Troubleshooting • Technical Documentation

PROFESSIONAL EXPERIENCE

Information Technology Network Technician | The Interconnection Point Limited | Apr 2017 - Jan 2023

- Supported enterprise network and telecommunications environments through installation, testing, troubleshooting, and maintenance of infrastructure components and structured cabling.
- Provided advanced technical support in live client environments, resolving connectivity, service availability, and operational issues.
- Built practical experience with network equipment and enterprise systems in production settings, strengthening readiness for security monitoring and incident triage.

Cellphone Repair Technician | The Phone Boss | Dec 2015 - Present

- Diagnose, repair, and test mobile devices across multiple platforms using structured troubleshooting and root-cause analysis.
- Document technical issues, explain solutions clearly, and maintain service quality in a fast-paced client environment.

EDUCATION & TRAINING

Per Scholas - Cybersecurity with AI Tools | Mar 2026 - Jul 2026

- Hands-on training in SOC analyst fundamentals, Splunk exercises, Packet Tracer labs, security investigations, and defensive analysis.

BoderCom International - Information Technology | 2009 - 2013

- Training included A+, Network+, and Microsoft Certified Professional foundations.

CERTIFICATIONS & CURRENT TRAINING

- **CompTIA Security+ Certified**
- **Google Cybersecurity Professional Certificate** - View verified Credly badge
- **Splunk Core User - In Progress** | Certification exam planned within the next month

SELECTED PORTFOLIO WORK

Network Incident Investigation • Windows Security Log Investigation • Enterprise Phishing Investigation • Brute-Force Login Investigation • Suspicious DNS Activity Investigation • Open Redirection Analysis • Wireshark Telnet vs. SSH Lab
